

Dilation : $I \oplus S$

Erosion : $I \ominus S$

看图, 知道两个操作的结果
(有不规则"S")

Open : $I \circ S = (I \ominus S) \oplus S$

eliminate details outside of the object
smaller than "S"

Close $I \bullet S = (I \oplus S) \ominus S$

eliminate details inside of the object
smaller than "S"

Gradient (Edge)

base : $I \oplus S - I \ominus S$

inner : $I - I \ominus S$

outer : $I \oplus S - I$

Reconstruction

- ① 移除接触到边界的物体
- ② fill holes

Gray:

Dilation = max pooling $\Rightarrow$ 去除小黑点

Erosion = min pooling $\Rightarrow$ 去除小亮点
